### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Teng (Reg. No. 40,837) on 3/18/05.

2. The application has been amended as follows:

**In the claims:**

Claim 1 (currently amended) A signal processing apparatus comprising:

a digital signal processor comprising an internal memory part storing a program to be executed;

an external memory part storing programs executable in said digital signal processor;

a clock signal generating part generating a clock signal and outputting the clock signal to said digital signal processor; and

a clock signal control part controlling outputting of said clock signal to said digital signal processor so that said programs stored in said external memory part can be forwarded to said internal memory part,

Art Unit: 2186

wherein the control of output of the clock signal is performed without initializing said digital signal processor, and

wherein the clock signal is stopped for transfer of the programs to the internal memory part.

Claim 8 (currently amended) A modem for modulating/demodulating a communication data by using a signal processing apparatus comprising:

a digital signal processor comprising an internal memory part storing a program to be executed;

an external memory part storing programs executable in said digital signal processor;

a clock signal generating part for generating a clock signal and outputting the clock signal to said digital signal processor; and

a clock signal control part controlling outputting of said clock signal to said digital signal processor so that said programs stored in said external memory part can be forwarded to said internal memory part,

wherein the control of output of the clock signal is performed without initializing said digital signal processor, and

wherein the clock signal is stopped for transfer of the programs to the internal memory part.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a) Oki (US 5,870,595) shows a clock signal to the DSP is cut off when a transfer halt signal output.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Denise Tran whose telephone number is (571) 272-4189. The examiner can normally be reached on Monday, Thursday, and Friday from 8:50 a.m. to 5:20 p.m..
